Title	Deploying Effective Monitoring & Evaluation (M&E) Frameworks
Subtitle	Using Monitoring and Evaluation to Drive Change
Facilitator	Mark Smith

Why This Course: This workshop is for training managers and monitoring and evaluation officers who need to understand, manage, plan and implement M&E in their training projects and development programs. The course addresses M&E for the entire results chain, including the critical outcomes.

This 4-day course covers the principles, and embeds the practice of M&E for results in Training Programs. What you will Learn

Through a mix of practical activities, theory and examples of effective practice you will learn how to:

- **Understand the unique relationship between Training Programs and M&E**
- **Contribute to an organization-wide architecture for M&E**
- **Decide what and how to monitor with different stakeholders**
- **Clarify key results at the program-level using logic models**
- **Plan a project using the logical framework**
- **Develop indicators and targets**
- **Create participatory methods for data collection and analysis**
- **Design and manage evaluation**
- **Use your M&E findings to stimulate learning, program improvement and stakeholder buy-in.**

Course Duration:

- **4 days**
